Your IPM
Solution with
First-Class
Integrated
Services

A low-angle, upward-looking photograph of a modern glass skyscraper. The grid of windows and structural beams creates a strong geometric pattern. The bottom portion of the image is overlaid with a semi-transparent green filter.

ANAQUA Services

Anaqua offers a variety of services to enhance your Unified Intellectual Property Management (IPM) experience and drive more value from your software investment. From global patent annuity, trademark and design renewals, to patent drafting, data verification, docketing and foreign filing, Anaqua's industry leading IPM software integrates a vast array of supplemental services that deliver significant cost savings and efficiency to your organization. Our client-focused principles promote first-class partnership services to meet the diverse needs of both corporate and law firm Intellectual Property teams.

PATENT ANNUITIES – TRADEMARK & DESIGN RENEWALS

Working with ANAQUA Services, ANAQUA's Patent, Trademark, and Design Modules provide portfolio reviews and payment decision workflows with the ability to interface to other annuity service providers as needed.

- Provides past and future payment data for cost projections at the patent and portfolio level
- The annuity and renewal interfaces allow you to follow the payment process
- Mitigate administrative burden on paralegals and attorneys
- Reduce number of invoices when multiple providers are used
- Reduce cost by up to 30%

FOREIGN FILING

Anaqua's integration provides '1-click quotes' based on the information in the ANAQUA record and in PCT filings at WIPO. Quotes include translation, official fees, and service charges including agent fees.

- Award winning agent network in more than 130 countries
- Flexibility of use: utilize our agents, your preferred agents, or a combination
- Eliminate double-entry of case status
- Instant, accurate quotes based on the characteristics of a specific patent application
- Manage filings quickly and easily online
- Official forms and filing instructions prepared by highly-qualified paralegals
- Single, itemized invoices provide cost transparency; track costs related to a specific set of filings

ANAQUA Services

DOCKETING

Anaqua streamlines docketing operations with outsourced services to reduce administrative burden and move paralegals and staff away from data entry onto higher value work.

- Docket key correspondence using remote access, upload documents, generate tasks and alerts
- Produce docket reports and reminders to attorneys, paralegals, and staff
- 100% second eye check – ensuring highest data quality
- Documented processes and ongoing audits
- Reduced administrative burden
- Historically, 30%-40% cost reduction
- Search reports and located references are uploaded into ANAQUA
- “Tag” IP assets “of interest” or relevant to a review; this includes an automatically created hyperlink between the review and the asset records in the system
- The Features Matrix saves attorney’s time; gives at-a-glance results
- Save all documents, emails, and notes in the record or Document Workspace
- Prompt turnaround time of 7-10 days for most searches

DATA VERIFICATION

Anaqua brings efficiency and best practice methods for verifying data to your IP practice, which saves your organization time and money.

- Compare your data with PTOs around the world
- Provide a report of discrepancies in your data
- Make changes within your Anaqua system and with PTOs
- Save time and reduce risk through single supplier
- Single point of contact for all questions
- Historically, 20%-40% cost reduction

PATENT & TRADEMARK SEARCH

ANAQUA leverages Collaborative Patent Search™ a unique process-driven method, developed by the Beacon Innovation Group. Collaborative Patent Search consistently provides researchers with the highest quality results from experienced search engineers and scientists.

- Experts in prior art research are teamed up with experts in technology area for best results
- Conduct a comprehensive search of PTO databases

TITLE UPDATES

The Patents and Trademarks Modules provide a full suite of tools to manage and leverage maintenance and assignment of IP. Support your patent process by configuring workflow and decision making assignments and proactively managing all related tasks. Provided by ANAQUA Services.

- Capture all critical information, including electronic documents, and provide visibility and links to related agreements, conflicts, and other records
- Instruct and manage numerous title updates automatically
- Leverage the US patent expiration date calculator taking into account earliest effective filed date, terminal disclaimers, and patent term adjustments
- Review portfolios and payment decision workflows with an integration to ANAQUA Services

PATENT DRAFTING

The ANAQUA Patent Drafting Module allows attorneys to request and track patent drafts. Use the ANAQUA Portal to request patent drafting from a team of Engineers and Patent Agents, with configurable workflow, notifications and reminders. Manage patent drafts in the ANAQUA Document Workspace.

- Patent drafts are delivered ready for filing at a significantly reduced cost
- Integrated, add-on prior art search can help save crucial time and avoid prosecution delays
- Drafting request and delivery happens in software and built-in workflow
- Streamlined workflows: request patent drafting through the portal, using data already integrated in system
- Better data security and reduced risk through a single provider

INTELLIGENT SCANNING

Intelligent Scanning automates the import of paper and electronic documents into the ANAQUA system. Document analysis determines which patent, trademark, or other case the document applies to, tags it accordingly, and uploads to the relevant case with full text-search functionality.

- Migrate documents into efficient, paperless work environment
- Support a broad range of US and European PTO forms
- Leverage Intelligent Scanning for initial data migration and ongoing projects
- Turn legacy documents into full-text searchable, electronic files and import to ANAQUA
- Typically save 20%-30% in time with significantly increased quality
